Procedural Generation

Joseph Walton-Rivers & Piers Williams

Tuesday, 15 May 2018

University of Essex

Question

What do we mean by procedural generation?

└ A definition

The act of **creating** content for games using **algorithms** as opposed to being **hand-crafted** by a human creator.

- Far too broad an area for a single lecture

A few notes...

- Far too broad an area for a single lecture
- we'll try it anyway...

F-Zero X Racing track generation

History of Procedural Generation

CE810 GD2

2018-05-25

History of Procedural Generation

- Procedural Generation used to be used due to space constraints
- Nowadays it tends to be to provide more content
- The games used PCG for:
 - Runescape** Dungeons
 - Dwarf Fortress** Everything
 - Spore** Music, Animation, and World
 - Borderlands** Guns from loot
 - Minecraft** Environment
 - Papers, Please** Immigrants

History of Procedural Generation

One of the most common uses for procedural generation is levels

- Procedural Generation used to be used due to space constraints
- Nowadays it tends to be to provide more content
- The games used PCG for:
 - Runescape** Dungeons
 - Dwarf Fortress** Everything
 - Spore** Music, Animation, and World
 - Borderlands** Guns from loot
 - Minecraft** Environment
 - Papers, Please** Immigrants

Level Generation

Rogue

- Spawned an entire genre based on procedural generation.
- Randomly generated dungeons

└ Rogue

Rogue

- Spawned an entire genre based on procedural generation.
- Randomly generated dungeons

Question

What methods are commonly used for generating levels?

Question

What methods are commonly used for generating levels?

- Binary Space Partitioning
- Random walks
- Cellular Automata
- Answer Set Programming
- Noise-based
- Grid Based

Cellular Automata

CE810 GD2

2018-05-25

└─Level Generation

└─Cellular Automata

- Some states (2 or more)
- You need a rule (eg, if at least 4 of your neighbours are alive, then return alive, else return dead)

```
for tile in grid:  
    neighbors = get_alive_neighbours(tile)  
    grid[tile] = rule(neighbours)
```

Demo

- Some states (2 or more)
- You need a rule (eg, if at least 4 of your neighbours are alive, then return alive, else return dead.)

```
for tile in grid:  
    neighbors = get_alive_neighbours(tile)  
    grid[tile] = rule(neighbours)
```

Demo

- Split the map into blocks
- Pick (or generate) a template for each block
- Place template on grid

Examples: *UFO: Enemy Unknown*, *Spelunky*

CE810 GD2

└─Level Generation

└─Grid Based

2018-05-25

Grid Based

- Split the map into blocks
- Pick (or generate) a template for each block
- Place template on grid

Examples: *UFO: Enemy Unknown*, *Spelunky*

Noise Based

CE810 GD2

2018-05-25

└─ Level Generation

└─ Noise Based

- Generate noise (usually gradient Noise)
- Interpret noise as values
- Place template on grid

Examples: *The Dwarves of Glistenveld*, *Minecraft*

- Generate noise (usually gradient Noise)
- Interpret noise as values
- Place template on grid

Examples: *The Dwarves of Glistenveld*, *Minecraft*

Assets

- Mostly game specific
- Not as much available publicly about how these are done.

- Used widely by games and film industry
- Mixed procedural generation and hand-crafted

A bit like this...

2018-05-25

CE810 GD2

└ Assets

└ Speedtree

- Used widely by games and film industry
- Mixed procedural generation and hand-crafted

A bit like this...

- Randomly generated weapons
- Over 17,750,000 different combinations
- Lots of properties which determines effects

- Randomly generated weapons
- Over 17,750,000 different combinations
- Lots of properties which determines effects

- Generate Weapons based on particle systems
- Based on NEAT evolutionary algorithm
- Choices based on what the player does
- Adapt to the player's experience based on usage

[Demo on their website](#)

2018-05-25

CE810 GD2
└ Assets

└ Galactic Arms Race

- Generate Weapons based on particle systems
- Based on NEAT evolutionary algorithm
- Choices based on what the player does
- Adapt to the player's experience based on usage

[Demo on their website](#)

- Procedural generated people with procedurally generated documents
- Gameplay dependant on unpredictability
- Hand crafted story elements

- Procedural generated people with procedurally generated documents
- Gameplay dependant on unpredictability
- Hand crafted story elements

Full Games

- Evolve rulesets for a given environment
- Uses learnability as predictor of fun
